---

### Summary

I really like programming, and in my free time I try to learn something new or improve my skills. I like solving problems when I have concrete tasks. But I don't feel comfortable when I try to create my own project. To relieve stress, I play the guitar and scream different songs. I quit smoking and go to the gym regularly. I love cooking, so I try to eat healthier. My favorite time is when I get the task, understand it, and type the code with music in my headphones. I'm looking for a job to have more moments like that.

### Education

- |                    |   |
|--------------------|---|
| <b>2024 - now</b>  | Slovak University of Technology in Bratislava |
| <b>2023 - 2024</b> | Technical University of Košice                |
| <b>2023 - 2024</b> | IT School GoIT                                |

---

### Academic Projects

- |                    |  |
|--------------------|--|
| <b>2024 - 2027</b> | <b>STU</b><br><i>Slovak University of Technology in Bratislava</i><br>Specialize in Python/C. We also do a lot of math. We haven't any projects in a team yet, but we work independently. Small game project in Python. C to solve complex tasks, such as a game or a JSON parser.   |
| <b>2023 - 2024</b> | <b>TUKE</b><br><i>Technical University of Košice</i><br>Specialization in C. I studied there only the first year because I was told that all classes would be held online. But I managed to work on a C game project in a team of 5 people. We had a project and problems to solve, and I took on the role of a person who checked the quality of the code and followed the deadlines.<br><br>I also had a final project in C in which I used the new ncurses library. It was a game about passing a maze. It had a few levels, work with different terminal sizes, and work with optional parameters and files. |
| <b>2023 - 2024</b> | <b>GoIT</b><br><i>IT School GoIT</i><br>Specialization in Python Junior Developer. Studied Python OOP concepts, including magic methods, classes, and functional programming. How to work with files and what GitHub is.<br><br>We had a web project. We worked in a team of 4 people and developed an API for a web application similar to Instagram using the FastAPI framework.   |
