Ivan Laushkin

Software Engineer

Summary

Applied Informatics student focused on developing reliable, scalable applications, with a broad IT foundation spanning software testing and databases. My primary interest is backend development, and I am open to learning new tools across other areas of IT. I speak four languages and enjoy sports and playing guitar. I am looking for an engaging software engineering project where I can contribute, grow professionally and maintain a healthy work-life balance.

Education

2024 - 2027 Slovak University of Technology in Bratislava
Applied Informatics (expected graduation: 2027)

2023 - 2024 IT School GoIT
Python Developer

2012 - 2023 "NUSH" Lyceum in Kropyvnytskyi

Skills

Programming: Python, C, C++, Java
Backend and databases: Django, FastAPI, PostgreSQL
Tools: Docker, Poetry, Git
Languages: English (B2), Slovak (B2), Ukrainian (native), Russian (native)

Projects

MacroTracker github.com/laushkin1/MacroTracker
Python, Django, PostgreSQL, Docker, Poetry, Fly.io

• Built and deployed a responsive nutrition tracker with user authentication and CRUD operations for food and meal entries.

• Integrated the OpenFoodFacts REST API for barcode-based product lookup and daily and monthly nutrition tracking.

• Containerized the app with Docker and Poetry; configured deployment with Gunicorn, WhiteNoise and Fly.io.

PersonalWebsite github.com/laushkin1/PersonalWebsite
HTML5, CSS, JavaScript, Leaflet

• Built a personal portfolio website with a printable CV and an interactive university guide.

• Implemented a dynamic class schedule and a Leaflet map with named locations, localStorage persistence and distance calculations.

MedievalWar github.com/laushkin1/MedievalWar
C11, ncurses, CMake

• Developed a turn-based strategy game with an interactive ncurses terminal interface and a 5 x 5 battlefield.

• Implemented army selection, movement rules, equipment-based combat and player-versus-player and computer-opponent modes.

Experience

Aug 2025 - May 2026 **Slovak Catholic Charity**
Project Assistant

• Digitized and organized project archives using content management software to improve information retrieval.

• Managed confidential documents and supported day-to-day project logistics.
